

1969 Solar Power Station

The C.E.G.B. has recently been given consent for A.G.R. stations at Heysham and Sizewell B and an oil-fired station on the Isle of Grain; it will also be constructing the second half of the Drax coal-fired ...

Frank Bridgers (United States) designed the world's first commercial office building that features solar water heating and passive design. The Bridgers-Paxton Building is listed in the National Historic ...

Detailed information about this event on the interactive timeline

Little more than a decade later, the first full-scale solar energy plant, the Solar Energy Generating Systems (Segs) facility was unveiled in California's Mojave Desert.

These stations, bobbing on the surface of bodies of water, combine the benefits of solar power with the cooling effects of water. Can you envision a serene lake, its surface dotted with panels, each ripple ...

The following 42 pages are in this category, out of 42 total. This list may not reflect recent changes.

The list includes the largest PV stations and parks throughout the world. They range from the very first large-scale PV plant with a capacity of only 1MW to the huge GW-scale solar PV farms.

One of 13 oil- and coal-fired power stations built by the Central Electricity Board (CEGB) based around the 500MW turbo-generator set, the largest then available, built during the 1960s and...

Outardes-4 is a hydroelectric power station and dam on the Outardes River 70 km (43.5 mi) northwest of Baie-Comeau, Quebec, Canada. The power station was commissioned in 1969 and is supplied by ...

DOE research and development efforts have accelerated solar industry progress by an estimated 12 years. This timeline features the key innovations that have advanced the solar industry in the United ...
