Conclusion
Inverters come in various sizes, but the basic rule is it should be at least equal to your system's DC rating. inverter size is measured in watts so it's easy to compare the two. In a 3000W solar system you need at least a 3000W inverter. However, inverters are not 100% efficient so you need to account for this. To be safe, the inverter should be 1...
