

Australian container energy storage factory address

Will Australia's first energy storage system be operational by 2026?

EnergyAustralia is actively pursuing the development of Australia's first four-hour utility-scale battery, the Wooreen Energy Storage System, with a capacity of 350 MW, set to be operational by 2026 in Victoria's Latrobe Valley. This project highlights the company's commitment to advancing energy storage solutions.

Why should you choose a container energy storage system?

Housed in durable shipping containers, our systems are engineered to meet the growing demand for renewable integration, backup power, and off-grid energy supply. Why Choose a Container Energy Storage System? All-in-One Power Solution- Integrated battery storage, inverter systems, and control units in one secure container.

Who is stor-energy?

Stor-Energy is a leading and specialist developer, owner and operator of large-scale battery storage systems across Australia's national electricity market. The company, CitiPower and Powercor, empowers communities by providing them with choices on how to generate, store, use, and sell energy, supporting the transition to a clean energy future.

Will Australia's first battery be 350 MW by 2026?

This project highlights the company's commitment to advancing energy storage solutions. EnergyAustralia has called for expressions of interest in the development of Australia's first four-hour utility-scale battery of 350 MW capacity by 2026 in Victoria's Latrobe Valley, which will be larger than any battery operating in the world today.

OEG provides DNV-certified containers and tanks for offshore energy in Australia & NZ, tailored to local needs and industry standards.
