

Belgrade anti-fouling solar glass

The glass is safer and stronger than heat-strengthened glass (that leads to larger and sharper pieces when broken), and qualifies as safety glass for BIPV, rooftops, and claddings.

With our range of self-adhesive and laminated smart films, we offer architects and designers in Belgrade innovative solutions for privacy, sunlight control, and energy efficiency while complementing the city's ...

The anti-reflection anti-fouling solar battery encapsulating glass can not only increase the light transmittance of the encapsulating glass but also has the self-cleaning and...

Thus, in view of developing cost-effective solution to soiling related issues, easy-to-clean and/or dust repelling (anti-soiling) surface are being widely investigated and have been deployed as ...

Our solar glass with renowned "Anti-soiling" and "Easy to clean" coatings. High performance solar glass for Bifacial modules, Glass-glass modules, Floating PV modules, Rooftop PV, BIPV, Car ports, ...

Originally developed for satellite and rover solar panels, ECS 5003 SolarProtect is an environmentally friendly, VOC-exempt, solvent-based hydrophobic nanoceramic coating formulated for maximum ...

When applied to photovoltaic modules, it is crucial to consider the factors such as self-cleaning, transparency, anti-reflection, anti-icing, and durability. In future research, it is significant to ...

SunMax Premium is exclusively produced in a float glass process. The industrial float glass process adheres to very strict production tolerances and guarantees the lowest possible defect density.

Direct laser writing fabricated hierarchical micro/nanostructure on glass, enabling simultaneous rain-clear visibility, broadband antireflection, and durable self-cleaning antifogging. ...

Enamelled glass is tempered or heat treated glass (thickness of 4-24mm) with one side covered with mineral pigments completely or partially. Colors used in this way can be synthetic or water based ...
