What is Broadsound solar and battery?

Broadsound Solar and Battery is an under-construction solar farm and Battery Energy Storage System (BESS) in Queensland, Australia. The renewable project is being developed by Iberdrola Australia. The solar facility will have a capacity of 376MW, while the 180MW BESS will be located adjacent to it.

Who will work on Broadsound solar farm & battery?

Yurika, a part of government owned electricity company Energy Queensland, will work on Broadsound Solar Farm and Battery in collaboration with Iberdrola Australia. As agreed, Yurika will be responsible for substation EPC works.

Where is Broadsound solar & battery located?

The construction works for the Broadsound Solar and Battery in Queensland, Australia began in early 2024. The solar facility will have a capacity of 376MW. (Credit: Cornell Frühauf from Pixabay) Broadsound Solar and Battery is located in Queensland, Australia. (Credit: © 2024 Iberdrola, S.A.)

When will Broadsound solar farm be operational?

It is expected to become operational in mid-2026. Once operational, the project will support Queensland Government's plan to achieve an economic decarbonisation target of 80% renewable energy by 2035. The Broadsound Solar Farm is located at Clarke Creek, around 150km north-west from Rockhampton and approximately 50km from Lotus Creek Wind Farm.

Iberdrola Australia has started installing the first of its solar modules at the 377MW Broadsound solar-plus-storage project in Queensland.
