

# Catching thieves from Liberia's solar container communication station batteries

11 months of social justice engineering boiled down to 15 minutes! I started a company called CrunchLabs where we build a toy together and then I teach you all the juicy physics for how it works.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

More than 120 low energy base telecoms stations that integrate solar and battery technology have been set up across rural Liberia to enhance network coverage.

In recent years, telecom base stations and sites all over the world have been suffering from battery theft. Even when the issue is localized to a single site or tower, finding out and ...

In summary, solar power supply systems for communication base stations are playing an increasingly important role in the field of power communication with their unique advantages. ...

"A total of 338 batteries worth R4 million stolen from MTN base stations were recovered in July last year, with 275 batteries worth almost R3 million recovered in September.

Two military officers, Mohamed Buya Fofanah and Idrissa Conteh, have appeared in court over allegations of stealing solar batteries and panels from a compound in Lungi. The incident, ...

One of the major risks associated with the transport of batteries and battery-powered equipment is short-circuit of the battery as a result of the battery terminals coming into contact with other batteries, metal ...

Thieves and vandals take advantage of remote locations of cell sites by trespassing freely, without the fear of being identified. Copper wires and battery theft exploit the second-hand market fueled by the ...
