

Community microgrids monrovia

Ever wondered how cities like Monrovia can transition from fossil fuels to renewable energy without blackouts? The answer lies in robust energy storage feasibility studies.

The Clean Coalition's Community Microgrids are designed to provide indefinite, renewables-driven backup power to critical facilities. Our Community Microgrid Initiative will provide a standard ...

Learn how a community microgrid can provide a layer of energy resilience, and how the Microgrid Incentive Program (MIP) can assist with project development and help your community pay for it.

One of the most promising aspects of community microgrids is their potential to bolster low-income communities. These communities often face disproportionate energy burdens, with ...

Now, the CPUC is developing a dedicated set of rules and guidelines specifically for community-scale microgrids. The investor-owned electric utilities (collectively utilities) and other interest groups have ...

The Clean Coalition established the Community Microgrid Initiative in 2010 to harness local solar and energy storage to deliver an unparalleled trifecta of economic, environmental, and resilience benefits ...

Pacific Gas and Electric Company (PGE) today announced its intent to award up to \$43 million in Microgrid Incentive Program (MIP) grant funding for the development of nine new ...

Pacific Gas and Electric Company (PG& E) intends to award up to \$43 million in Microgrid Incentive Program (MIP) grant funding for the development of nine new community-driven microgrids ...

The exchange offers a library of data and resources, peer-to-peer exchanges, and trainings and workshops. Anyone interested in microgrids, including vendors, energy providers, researchers, ...

To achieve our Community Microgrid vision, the Clean Coalition is designing and staging numerous Solar Microgrids at critical community facilities, which will be ready to connect to larger Community ...
