

Construction of Vanuatu Wind Solar and Energy Storage Project

Discover how Vanuatu is pioneering wind energy integration with advanced storage systems to achieve energy independence and climate resilience.

Explore real solar, battery, and hybrid energy projects we've delivered for homes, schools, businesses, and communities across Vanuatu.

This ambitious project will be situated on the Kawene plateau in Efate, adjacent to the existing wind farm and solar facility, making it the largest solar farm in the country. The ...

The Community Powerhouse model, implemented in remote island communities of Vanuatu, provides decentralized wind- and solar-generated electric power through a series of micro-grids and battery ...

In the first half of 2023, China's new energy storage continued to develop at a high speed, with 850 projects (including planning, under construction and commissioned projects), more than twice that of ...

Although Vanuatu is a net carbon sink and has pledged highly ambitious decarbonisation measures within its Nationally Determined Contributions to fulfilling the goals of the Paris Agreement, the ...

Vanuatu currently has one of the lowest electricity access rates in the world. Under the RESSET project, New Zealand will serve as the lead donor, providing the majority of funding for the ...

Access to energy is a game-changer for remote communities, and the Government of Vanuatu is planning to embark on a comprehensive programme which will electrify most inhabited islands in ...

This ambitious project will be situated on the Kawene plateau in Efate, alongside the existing wind farm and solar facility, establishing it as the country's largest solar farm.

WEV is implementing a novel renewable-energy technology that is set to become - globally - a major component of the renewable energy mix, alongside wind & solar installations. WEV will be one of the ...
