

Delivery time of 10MW solar-powered container for field research

A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. These turnkey solutions integrate ...

Our line of solar transportable power units (TMSPDC™; Power AnyWhere Any Time™;) provides stand-alone photovoltaic power. These portable units supply AC power just about anywhere the sun shines.

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy storage effectively.

Our all-in-one WaterSecure kit transforms your shipping container into a functioning off-grid enclosure. With two different sizes to choose from - the WS-6K, and WS-12K - you can enjoy up to 6,000, or ...

Fully pre-assembled and factory-tested, these units arrive on-site ready to operate--requiring minimal installation time compared to traditional solar farms or diesel generators. They can be transported via ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular design for easy ...

We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

Each containerized Solarator(TM) BESS can be rapidly deployed in remote, regional, and urban environments within 30 minutes, and we offer redundancies to ensure an uninterrupted power supply.

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly ...

Delivery includes transportation to site, crane/forklift placement, solar array installation (if ground-mounted), system commissioning, MOBICARE (TM) activation, and operator training.
