

Eco lithium battery problems

The one we have parked is going to get one battery, the other, two batteries in parallel as we plan on doing some off-grid camping. They came charged at 40% and I charged all three up to ...

Pushed it home and plugged in the charger. It was still reading 56.xx% remaining while charging and was reading 45.57V. After several hours it was reading 100% and 54.x Volts.

No promise date yet from ECO, but they advise to keep battery charged if the gauge is not working. BTW, the gauge will "come back to life" periodically. Also, if you have access to the back ...

Eco Battery offers high-quality lithium batteries for golf carts & LSVs. We offer replacement options for your traditional lead acid batteries at an affordable price.

Lithium batteries (Lifepo4) are becoming more and more common in daily life. What would you do if you're experiencing issues with the lithium battery? Now, check out these common ...

From overheating to reduced lifespan, this guide covers common lithium-ion battery problems and provides practical solutions to fix them.

I'm wondering if anyone else has had this problem with Eco.Worthy batteries. This morning I woke up to find one battery completely discharged and the other one at thirty nine percent.

Do not open the battery pack for any reason, there is a risk of electric shock. Do not connect batteries in series to obtain a higher voltage pack. Make sure the battery pack voltage is correct for the ...

I have two 10K Eco-worthy inverters and 6 Eco-Worthy 48V batteries mounted in a rack. I had the system connected to the house for an hour last week just to test it.

In this guide, we'll walk you through the process of troubleshooting common lithium golf cart battery issues, empowering you to keep your cart running smoothly.
