

Edge Computing Smart Energy Storage Cabinet with Constant Temperature and Humidity

Features Highly integrated, saves space One standard cabinet provides constant operating conditions as required by all IT devices Only 0.7m³; system footprint, compact and state-of-the-art Dust proof ...

ArcTiv Edge-Series Cabinets are designed for protecting and managing networking devices commonly used in PoE+, IIoT and Edge-Computing applications.

Modular 26U/42U all-in-one data center cabinet with energy-efficient cooling, environmental monitoring, and scalable design for edge computing applications.

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.

As businesses seek faster ROI, enhanced safety, and operational simplicity, the All-in-One C& I Energy Storage Cabinet meets these needs with a true plug-and-play solution.

The Edge Computing Enclosure is a specialized protective housing designed to ensure stable operation of edge computing devices in harsh environments.

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions offer remote ...

Explore what Edge computing is and how it (and the right IT enclosure system) can handle scalability, security, protection, disruptors, and standalone solutions.

This sturdy structured cabinet houses network servers, Edge computers, monitoring systems, and energy storage to provide uninterruptable power even in the most remote sites that are not reachable ...

Advanced sensors inside cabinets constantly track temperature, humidity, power status, and physical security. These sensors send data to a central platform, where operators can view live ...
