

Energy Storage System Return

Who is return energy storage?

Return is the leading independent energy storage provider across Europe, committed to helping revolutionize the energy sector. We focus on infrastructure, enabling our customers to access our network of large-scale energy storage solutions that we build, own, and operate, so we can deliver storage-as-a-service.

What is return & how does it work?

Return builds and operates large-scale energy storage systems and offers them as a service. As an independent infrastructure partner, Return enables utilities to balance supply and demand efficiently without capital expenditure or operational risk. Benefits for utilities:

What is return & how does it benefit large energy consumers?

Return enables large energy consumers to access our high-tech platform of large-scale energy storage systems. Factories, data centers, and logistics companies are then able to enhance the efficiency of existing grid infrastructure and limit exposure to price volatility. Benefits for large energy consumers:

Who is return?

Making clean energy work for everyone. Return is the leading independent energy storage provider across Europe, committed to helping revolutionize the energy sector.
