

Foreign bloggers introduce China's solar power generation

China has achieved stunning growth in its installed renewable capacity over the last two decades, far outpacing the rest of the world. But to end its continued dependence on fossil fuels, it ...

BEIJING, Dec. 25, 2025 /PRNewswire/ -- When British vlogger Adam was told by an 89-year-old villager in Yunnan of "no more fear of floods," and Barrett held crabs under solar panels in Jiangsu,...

While Western media often paints China as the world's coal-guzzling giant, a different energy narrative is unfolding. Imagine this: By 2023, China's solar capacity alone could power all UK households 18 ...

China is expanding renewable energy exponentially while the U.S. is going backward. How China became the global leader, why the U.S. falling behind and what it means for these ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

Readers can expect to gain insights into China's solar energy landscape, including its innovative manufacturing processes, government initiatives, and the impact of solar power on the ...

China was responsible for installing a massive 256 GW of that solar capacity. For context, it took until September last year to pass the 350 GW mark. This year, the milestone was achieved in...

In China, more wind turbines and solar panels were installed last year than in the rest of the world combined. And China's clean energy boom is going global. Chinese companies are...

U.S. President Donald Trump may have spurned solar power, but that has done little to slow the solar revolution that is sweeping nearly every other corner of the world, from Pakistan to...

A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar ...
