

Hoisting of photovoltaic panels in boxes

GEDA Solarlift is a reliable device on every construction site to transport and assemble solar panels and photovoltaic systems securely. The solarlift also comes with an extra post that supports the ladder ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

Geda Solarlifts - Different Modalities For Your Application Area
Unique Concept: The Solar Platform
Geda Solarlift - One Device, Several Advantages
The GEDA Solarlift has particularly been designed for working with sensitive materials and offers a specific solar platform for a safe transport of expensive solar panels. The platform provides a specially developed plastic surface and an extra fixation possibility which can be adjusted as desired. The second transport variation is the collector pl...

Handling solar panels is easy and efficient with UniMove solar panel lifters. Everyone can lift and tilt large solar panels, powered by vacuum technology. UniMove offers a solar panel lifter for every step ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

Easy Shipping & Assembly: Comes in a flat-pack box for quick transport and simple setup on site. Safe & Reliable: Automatic rope-locking mechanism keeps panels secure during lifting.

The NextGen TranzVolt e-Hoist(TM) is a revolutionary product perfect for lifting solar panels, shingles, tools, and other construction supplies to the roof easily and quickly.

The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables you to lift solar modules to the ...

Installing solar photovoltaic (PV) panels isn't just about positioning modules on rooftops. The hoisting process directly impacts safety, project timelines, and long-term system performance.

It takes less than 30 seconds to safely and easily lift solar panels and equipment to a two-story roof. At the end of the day simply tuck your lift into a regular work van, or even a car, where it is ready to set ...

The TranzVolt is a battery powered, solar panel hoist, which allows for the vertical lift of modules to the rooftop. This is an excellent option for projects located in remote, off grid, or new construction areas ...
