

# Homemade Cleaning Photovoltaic Panel Tutorial

How do I keep my solar panels clean?

Stick to basic cleaning with water, maybe a bit of soap, and a soft cloth or brush. Always check the guide that comes with your panels to make sure you're doing things right. Basically, keeping your solar panels clean is more about being gentle and using common sense than anything else.

How do you clean a solar panel if it's under warranty?

If your panels are under warranty, be sure that DIY solar panel cleaning won't void the coverage. Use a solar panel cleaner or a mild soap mixed with water to clean your solar panels. Avoid using a pressure washer, as the force can damage the panels. Gather: For safety reasons, shut down your solar system before beginning the cleaning process.

How do you clean solar panels if it's Hot?

**Work During Cool Weather:** Avoid cleaning solar panels during the hottest part of the day. The heat can cause the water to evaporate quickly, leaving streaks and potentially harming the panels. Early mornings or evenings are ideal. **Use Proper Equipment:** Avoid harsh chemicals or abrasive cleaning tools. You'll need:

How long does it take to clean a solar panel?

Effective solar panel cleaning requires surprisingly few specialized tools, mostly available at hardware stores for under \$100. Essential cleaning equipment: Never use these items--they damage panels: Follow these steps for safe, effective cleaning: Plan for 30-60 minutes depending on your system size and soiling level.
