

Huada IC Card Smart Microgrid Goodix Technology

Driven by R& D investment, Goodix continues to expand its portfolio, focusing on under-display fingerprint advancements, AI-enhanced biometrics, and automotive-grade HMI innovations to shape ...

Goodix Technology is an integrated solution provider for applications based on IC design and software development. We provide industry-leading software and hardware semiconductor ...

Shenzhen Goodix Technology Co., Ltd., together with its subsidiaries, operates as an integrated solution provider for applications based on integrated ...

Goodix Technology is an integrated solution provider for applications based on IC design and software development. We provide industry-leading software and hardware semiconductor solutions for smart ...

With its expertise in research and development, design, and application of IC products, these products are widely used in FinTech, network communication, IoT, Internet of Vehicles, smart mobility, and ...

HED smart card chips are widely used in social security, telecommunication, financial payments, mobile payments, transportation, gas card, residents' health, etc.

SMICs 55nm low-power embedded flash platform provides a high-performance, low-cost solution for smart card chip customers.

We Provide Comprehensive Smart Card Chip & OS Solutions to Global Card Manufacturers. Our products have been widely used by top-tier card vendors in most competitive markets of China & Asia.

In February 2021, British technology company WaveTouch sued Goodix for patent infringement. It alleged that Goodix copied its system designed to improve the accuracy of fingerprint readers ...
