

Intelligent solar cabinets for Highways

A self-contained solar-powered enclosure with LED lights, designed for sustainable traffic control. It ensures energy efficiency and reliable operation in remote locations.

Join us on this journey as we delve into the world of cutting-edge technologies that are reshaping toll road control cabinets and paving the way for smarter, more efficient toll road management systems.

Designed for road administration use, these cabinets house critical components such as programmable logic controllers (PLCs), power distribution units, communication modules, and backup batteries.

As a pioneer in intelligent transportation solutions, Econolite sets the standard for traffic control cabinets and traffic signal cabinets. These cabinets power the next generation of smart intersection technology.

Carmanah is a leading manufacturer of compliant solar and AC-powered systems for traffic safety with thousands of installations across North America.

ITS cabinets provide smart design, ample space, and modularity, perfect for applications such as traffic control, sign control, and ramp meters.

The application of solar LED road studs on highways has significantly improved road safety. Their high brightness, all-weather adaptability, environmental protection and energy saving, ...

We design, manufacture, and test our cabinets and enclosures to offer functionality, security, and protection against weather and vandalism. Southern Manufacturing's remote & field enclosures are designed to deliver ...

Learn what makes our standard and custom cabinets top choices for ITS/Traffic applications below. To reliably store Department of Transportation equipment, Multilink offers a variety of aluminum and stainless steel ...

Uniquely designed using durable polycarbonate, TAPCO's new 13-Watt Top-Of-Pole Self-Contained Solar Cabinet is a lightweight option that powers a wide range of traffic-calming devices.

The application of solar LED road studs on highways has significantly improved road safety. Their high brightness, all-weather adaptability, environmental protection and energy saving, and low maintenance ...
