

Is it not recommended to install photovoltaic panels Zhihu

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Where can solar panels be installed?

The roof of your home is the most common site for solar panels -- but it's not the only place they can go. Homeowners who can't get rooftop solar panels can get creative and find another site. Solar panels can be installed on a carport, gazebo, or pergola.

What should I know before choosing solar panels?

Understand the common concerns, such as initial costs and maintenance, before deciding on solar panels or not. Compare different solar options, including rooftop and community solar, to find the best fit for your energy needs. So, you're thinking about solar?

Should you install solar?

"It depends on what is motivating the household to make the decision to [install] solar," Becca Jones-Albertus, director of the US Department of Energy Solar Energy Technologies Office, told CNET. If you're looking to be 100% energy independent or live off the grid, solar could be a good way to reach those goals.
