

Latest on Colombian energy storage projects

Meta Description: Explore Colombia's ambitious zero-carbon energy storage projects, bidding opportunities, and how innovative solutions like solar-storage hybrids are reshaping the renewable ...

Search all the ongoing (work-in-progress) battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Colombia with our comprehensive online database.

Colombia, like many countries, is experiencing an increasing energy demand as well as challenges related to security of supply.

Get the latest on clean power, hydrogen and the industrial transition, and data center infrastructure across Latin America and the Caribbean, delivered to your inbox every two weeks.

The new mechanism introduces technology-specific products, extends commissioning deadlines to 2035, and formally recognises energy storage as a core asset for power system ...

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellin - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national grid.

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar power, and ...

Colombia's Energy and Gas Regulatory Commission (CREG) has published a draft resolution establishing technical, commercial, and tariff conditions for battery energy storage systems ...

Allow for new clean energy technologies and innovations to qualify for tax benefits, tariff schemes and other similar incentives - for example, by expanding incentives for clean hydrogen ...
