

# Latvian solar Power Station Energy Storage Project

Lithuanian power producer Green Genius has launched the largest single-site solar project in the Baltic States--a 120.8MW facility in Latvia, featuring 183,000 modules and a planned ...

A 84 MW of solar and 26 MW of energy storage portfolio will be installed in Latvia under the Niam-Evecon partnership. Discover the full project details here.

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia. This collaboration represents a ...

By combining large-scale solar generation with advanced battery storage, the project serves as a model for future renewable energy infrastructure. It demonstrates how to effectively ...

European renewable energy provider SUNOTEC has finalized the acquisition of SIA DSE Lazas Solar's solar and energy storage project in Latvia from Danish Sun Energy. This transaction ...

Lithuania-headquartered renewable energy company Green Genius has switched on a 120.8 MW solar park in Latvia. Billed as the largest single-site solar park across the Baltic States, the ...

The 120.8 MW project, built by Lithuanian renewables developer Green Genius, is the largest single-site project in the Baltics. Work is currently underway on constructing a 50 MW/100 ...

The Saldus project combines a 65 MW solar PV facility with a 46 MW battery energy storage system (BESS). Construction began in July 2025 and is expected to be completed in May ...

It features 183,000 solar modules, with power transmission managed by 312 inverters and eleven transformer substations. Green Genius, which invested EUR96 million (\$113.1 million) into the ...

European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...
