

Liebert inverter voltage low

What is the default battery voltage on a Liebert psi?

The factory default setting is 120 VAC. The batteries are valve-regulated, nonspillable, lead acid and must be kept charged to retain their design life. The Liebert PSI continuously charges the batteries when connected to the utility supply, even while the UPS is switched Off.

Does the Liebert PSI have an emergency power off switch?

The Liebert PSI is equipped with an Emergency Power Off (EPO) switch. The user must supply a means of interfacing with the EPO circuit to allow disconnecting the UPS input feeder breaker to interrupt all sources of power to the UPS and connected equipment to comply with national and local wiring codes and regulations.
