

Namibia to build solar power generators for home use

We offer expert domestic solar installations in Namibia, including grid-tied and off-grid solutions for residential homes in Windhoek, Swakopmund, Keetmanshoop, and anywhere else in Namibia.

This project not only helps Namibia meet its energy demands but also aligns with regional trends toward solar and wind development, positioning the country as a key player in ...

Named "Sores Gaib," meaning "Power of the Sun" in the local language, the plant is a strategic move for Namibia to convert its natural solar advantage into genuine energy independence.

WINDHOEK, June 20 -- Namibia officially broke ground on Thursday for its largest solar photovoltaic power plant, the 100-MW Sores Gaib Power Station, marking a major step toward enhancing the ...

Namibia has commenced building its largest solar facility, Sores Gaib, to reduce its reliance on energy imports by utilising its significant solar capability, which is regarded as one of the highest ...

According to the Managing Director of NamPower, Simson Haulofu, the 100 MW photovoltaic (PV) plant will be built in Rosh Pinah and is expected to start operating in the second ...

Located approximately 33 km northwest of Rosh Pinah in the Kharas Region, the plant represents a major stride toward strengthening Namibia's domestic energy generation and reducing ...

On 19 June 2025, NamPower officially commenced construction of the 100 MW Sores Gaib Solar PV Power Station, marking its largest solar power project to date. The groundbreaking ceremony took ...

Namibia plans to add 93 megawatts of renewable energy capacity during the financial year ending 2026 as part of a strategy to reduce electricity imports.

HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions). We are ...
