

POWER is at the forefront of the global power market, providing in-depth news and insight on the end-to-end electricity system and the ongoing energy transition.

Stay informed by receiving the latest wind energy news, events, and updates. DOE-funded grid-enhancing technologies such as dynamic line rating help utilities safely deliver more power, ensuring ...

Recently, the Jinkai New Energy Mulei Wind Power Project in Xinjiang, constructed by China Construction Third Engineering Bureau, was successfully connected to the grid, marking a key ...

The enormous S2000 Stratosphere Airborne Wind Energy System (SAWES) flew at an altitude of 2,000 metres in southwest China's Sichuan Province, generating electricity and ...

A record-breaking 20-megawatt (MW) offshore wind turbine has been connected to China's grid in the Fujian Province.

To strengthen community grids and improve access to electricity, this article investigates the potential of combining solar and wind hybrid systems. This is viable approach to address energy ...

The UK and nine other European countries have agreed to accelerate the rollout of offshore windfarms in the 2030s and build a power grid in the North Sea, in a landmark pact to turn ...

On February 8, 2026, the first wind power project of Huaneng in Tibet, Huaneng Caipeng Wind Power Project, officially connected its first batch of units to the grid for power generation, ...

Comprehensive news & insights into global renewable energy projects, covering key milestones in corporate PPAs, equipment orders, financing, and capacity expansions.

Abstract: China adheres to the concept of green and sustainable developmen., and wind power new energy aligns well with this concept. At the same time, it has lower economic costs and ...
