

# New Zealand Solar Outdoor Cabinet for Agricultural Irrigation 600kW

How does New Zealand support farm solar?

Typical Pricing (2024-2025): The New Zealand government has increased support for farm solar through several recent initiatives: EECA Solar for Farms Programme: Energy Efficiency and Conservation Authority now provides specific guidance and support for agricultural solar projects, including technical resources and connection to approved installers.

How many solar panels does a Whakamaru dairy farm have?

A 25kW, 72 solar panel system for a Whakamaru dairy farm. Check out some flyover videos of the solar installation. If you are looking for a more budget-friendly set-up, take a look at this solar panel installation. This is a 10 kW system, comprising 30 solar panels, installed for a client's dairy farm shed in Tongaporutu.

Can solar power help horticultural farms?

Solar power is an ideal method of assisting horticultural farms to produce more, and lower costs. Due to the nature of horticultural farming, a large amount of water is required for irrigation - a heavy consumer of power. Solar power systems are a great solution, as summer sunshine and the need for irrigation go hand-in-hand.

How long does a solar irrigation system last?

Solar is the only irrigation energy source that gives back! The payback period for a solar irrigation system can range between 3-10 years depending on how efficiently you manage the system. Once payback has been achieved, all the money you save on running costs per year is yours to put to use where it can be better utilized on your block.
