

New energy storage growth rate

US battery storage hits record 5.6 GW in Q2 2025, led by utility-scale growth, but sourcing rules may slow future gains.

Energy Storage Resources SEIA has launched a new energy storage resource with myth-busters, industry data, and information about the growth of this expanding industry. Learn about the ...

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by ...

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 GW of installations, according to the latest U.S. Energy Storage Monitor report released today by the ...

The U.S. energy storage industry achieved a record-breaking milestone in 2025, installing 57.6 gigawatt-hours of new capacity--the largest single-year addition of battery storage on record. ...

The U.S. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies. The market is valued at ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Most of the growth was driven by California, Arizona, and Illinois, as attachment rates hit new highs and higher-capacity systems gained market share. Community-scale, commercial and ...
