

Outdoor solar power hub produced in Türkiye

Türkiye is making significant strides in solar energy with its Kalyon Karapınar Solar Power Plant, now the world's largest photovoltaic park. However, it is not alone in its ambition.

The construction of the Kalyon Karapınar Solar Power Plant assisted Turkey in reducing its substantial energy imports and supported its efforts to increase the production of renewable ...

With the commencement of power generation at this facility, all the production bases in Europe, including Türkiye, are 100% powered by renewable energy. In Europe, AISIN is committed ...

By combining our experience with a production approach that makes a difference with its quality and efficiency, we established our panel production factory with a capacity of 1.2 GW at the beginning of ...

A Turkish photovoltaic power plant, equipped with Talesun facilities, will soon be connected to the grid. Located in the Kahramanmaraş Province of Türkiye, this project has an ...

Artibir Antalya Solar PV Park is a ground-mounted solar project. The project generates 46.7GWh electricity and supplies enough clean energy to power 4,000 households, offsetting 17,916t of carbon ...

Built in the Renewable Energy Resource Area (YEKA) in Karapınar district in Konya Province, the plant has 1,300 MW installed power and covers an area of 20 square kilometres (7.7 sq mi). With this ...

Developed by Kalyon Energy, the solar plant in the central province of Konya boasts an installed capacity of 1,350 megawatts (MW). It promises to help Turkey curb its vast energy imports.

The Selçuklu Municipality of the Central Anatolian province of Konya has drawn attention by producing energy from solar panels and preventing the cutting of thousands of trees and tons of ...

Situated in Konya's Karapınar neighborhood, the Karapınar Solar Power Plant is not only the biggest in Türkiye but also among the biggest and most influential solar energy plants in Europe.
