

# Photovoltaic energy storage expands new channels

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Get the latest updates on battery tech, grid-scale storage & green energy - with trusted news, trends & expert commentary

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

pv magazine's global monthly edition offers authoritative reporting, market-driven analysis, and expert perspectives on the technologies, policies, and investments transforming global power...

Several CSP projects are underway to provide 100-hour+ energy storage. U.S. PV Deployment The International Energy Agency projects significant growth for photovoltaics (PV) in ...

Alongside EV batteries, the company produces large-scale, stationary energy storage systems designed to support renewable energy integration, power grid stability, power transmission ...

The report shows that in the second quarter of 2024, the United States added 11GW of new utility-scale photovoltaic, energy storage and wind power installed capacity, a year-on-year ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

"Despite regulatory uncertainty, the drivers for energy storage are strong and the industry is on track to produce enough grid batteries in American factories to supply 100% of domestic ...

A report from Wood Mackenzie identifies five key trends that will define the energy storage industry in 2026, including supply chain restructuring and the rise of non-lithium batteries.
