

Photovoltaic solar power generation can be mortgaged

Are solar panels a good option for a mortgage?

Mortgage Adviser at Boon Brokers Updated: Sep 3rd, 2025 As the UK housing market becomes increasingly energy-efficient and green in its outlook, solar panels have been increasing in popularity as a smart solution to save on your energy bills. But when it comes to mortgages, solar panels and mortgage lenders don't always see eye-to-eye.

Will solar panels affect my mortgage or remortgage process?

As such, the feature of solar panels will not likely affect your mortgage or remortgage process. However, if your panels are leased or tied to a long-term roof lease agreement, lenders may view this as a potential legal complication. As a result, lenders will want to ensure the following:

Do mortgage lenders consider solar panels a risk?

As we noted above, if the panels are owned outright, most mortgage lenders treat the property the same as one without solar panels. However, leased solar panels or those installed under a roof lease agreement are likely to be assessed by lenders as higher risk.

What is third-party solar financing?

Third-party solar financing is a well-established financing solution in the United States for solar projects. It predominantly occurs in two forms: solar leases and power purchase agreements (PPAs).

As solar panel deployment becomes more prevalent, commercial lenders will increasingly encounter buildings, fields and parking lots covered in photovoltaic systems. When calculating ...

The PPA is a contract between the solar system owner and the property owner, allowing the building to host a solar power system without upfront costs. The TPO typically files a UCC-1 ...
