How much does a solar farm cost?

The most commonly-asked question by landowners regarding solar farms is, "How much can I lease my land for?" The short answer is, "it depends," but solar lease rates (also called "rents") typically range from about \$450 to \$2,500 per acre, per year--though can go much, much higher.

How much does a solar lease cost?

The short answer is, "it depends," but solar lease rates (also called "rents") typically range from about \$450 to \$2,500 per acre, per year--though can go much, much higher. This article looks at the factors that influence the rates a solar developer may offer for your land.

How much does a community solar project cost in New York?

And in this case, the going rate for land in NY for community solar projects currently hovers between \$1,000 and \$1,500 per acre. Compare that to central Texas, where lease rates are typically in the \$500-\$1,500 per acre range. Lease rates can spike, at least temporarily, in response to a variety of triggers. For instance:

How do solar farms work?

Solar developers will only build solar farms in regions where there is a demand for solar energy. That, in turn, is driven by any combination of three broad factors: Whether the state (or in some cases a utility, city or county) has a goal for how much energy must come from renewable sources (this is called a Renewable Portfolio Standard, or RPS).
