

List of Japanese solar panel installers - showing companies in Japan that undertake solar panel installation, including rooftop and standalone solar systems.

This article covers considerations on Tokyo's new solar panel installation mandate, current energy generation challenges and examples from Germany's initiatives.

A new system requiring the installation of solar panels on newly built homes in Tokyo took effect on April 1, 2025. Tokyo has implemented an ordinance mandating the installation of solar panels on newly ...

On April 1, 2025, the Tokyo Metropolitan Government implemented a new regulation mandating the installation of solar power systems and energy-saving measures in new residential buildings.

By 2040, it aims to introduce 20 GW of perovskite solar cell capacity to promote its installation on roofs and building walls with low load-bearing capacity.

To maximize the use of solar energy and overcome those drawbacks, two promising technologies have been developed: space-based solar power (SBSP) and next-generation flexible ...

The Ministry of Economy, Trade and Industry on Nov. 26 announced a new target to install about 20 gigawatts of next-generation perovskite solar cells--equivalent to powering 5.5 million...

Discover the top 10 solar companies leading Japan's renewable energy market in 2025. Explore global giants, innovative technologies, and why Grace Solar ranks #1 for mounting systems.

OverviewSolar manufacturing industryGovernment actionSee alsoExternal linksSolar power in Japan has been expanding since the late 1990s. Japan is a large installer of domestic PV systems, with most of them grid connected. The country was a major manufacturer and exporter of photovoltaics (PV), with a global market share of around 50% in the early 2000s. However, by 2019, this had dropped to below 1% due to the rise of state-backed production in China.

Although conventional PV is no longer mass-produced in the country, Japan has been investing in perovskite solar cell technology in recent years, a technology invented by Tsutomu Miyasaka.

Learn everything about solar panel installation in Japan: costs, regulations, energy savings, and government incentives for homes and apartments.
