What is a solar PV combiner box?

Cost-effective solar pv combiner box for sale online, with 4/6/8/10 pv array input numbers, maximum open circuit voltage 1000V, single way input array maximum current of 10A, protection class Ip65. Solar combiner boxes have a current-attack, over current protection, over-voltage protection and a series of perfect protection.

What is a combiner box & how does it work?

The function of the combiner box is to connect the solar panels to a box. This is the most basic function of it. Each wire is connected to a fuse terminal; the output of the fuse terminals is combined into a cable connected to the inverter box. The box consolidates the amounts of cables running into the inverter.

Why do you need a combiner box for an inverter?

The box consolidates the amounts of cables running into the inverter. Less cables equals more savings on material costs and labor costs. You have also added enhanced protection to the inverter installation combiner box. These boxes protect from overvoltage and overcurrent flowing into your inverter.
