

Solar power generation infrastructure projects

In this article, we explore notable projects shaping the new energy landscape, the critical role of policy frameworks like the National Environmental Policy Act (NEPA), and the collaboration ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

We look at some of the biggest, boldest and most innovative renewable energy infrastructure projects happening across the world, including in China, Africa. The global energy ...

In this week's Top 10, we explore the top 10 energy infrastructure projects driving progress and paving the way for a cleaner, more resilient future.

We look at some of the biggest, boldest and most innovative ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

Explore the top US utility-scale solar projects of 2024-2025. Learn how gigawatt-scale farms and integrated battery storage are powering America's energy future.

Solar energy projects across the U.S. are scaling up, with major developments in Maine and Massachusetts reshaping the energy landscape.
