

The energy storage power station was successfully connected to the grid

We're excited to announce that a 50MW/100MWh centralized (shared) energy storage power station project in Hubei Province has been successfully connected to the grid.

The BYD energy storage power station supporting the country's largest single "wind, solar, thermal and hydrogen storage integration" project was successfully connected to the grid!

Recently, the Sanxia energy storage project was successfully connected to the grid and put into operation. This project is currently the largest series-type energy storage power station in ...

On September 30, the 49.8MW/99.6MWh grid-side energy storage power station of Suqian Zhonghe East Line New Energy in Jiangsu was officially connected to the grid.

This achievement marks a significant milestone for Panzhihua in advancing new energy storage technologies and establishes Sichuan's first grid-connected vanadium flow energy storage ...

The world's largest single-site electrochemical energy storage power station--the Envision Jingyi Chagan Hada Energy Storage Power Station--was successfully connected to the grid, ...

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under ...

Far East Battery has successfully supported the grid connection and stable operation of an independent energy storage power station in Hengshui, Hebei Province, with a total capacity...

A landmark compressed air energy storage (CAES) power station utilizing two underground salt caverns in Yingcheng City, central China's Hubei Province, was successfully ...

On May 15, the Hainan Talatan 255 MW · 4h energy storage project, developed by China Energy Investment Corporation Co., Ltd. (CHN Energy)'s Qinghai Gonghe Company, ...

The energy storage power station was successfully connected to the grid
