

There is a wind turbine location

Wind turbines are a growing global source of renewable energy, with land-based options being the most popular. The best locations for wind farms include coastal areas, rounded hills, open ...

Use an Interactive map to find the best places for wind turbines around the world. 30 000 places were carefully found using machine-learning algorithms and tons and tons of data of different parameters.

By using the Wind Farm Locations Map, you can explore the development of wind energy across the country and see the progress being made toward a cleaner, more sustainable energy grid.

The turbines for Phase 1B are located in the Fengxian District, Shanghai, China, with exact coordinates for Phase 1 being 30.7566, 121.8196. The wind farm is owned by Shanghai Electricity Xinda...

Wind turbine map, always up-to-date with more than 300k turbines worldwide. Open-street-map (OSM) provided info boxes with turbine type, manufacturer, rated power, hub height, rotor diameter and ...

As a reminder, the best locations for wind turbines are typically in coastal areas, hilltops, and open plains where wind speeds are consistently high. The capacity of wind turbines can vary ...

Wind energy has become a cornerstone of the global renewable energy transition, with countries investing heavily in both onshore and offshore wind farms. As of 2023, wind energy accounts for over ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

The tool allows you to explore wind farms in any country using a world map, in addition it allow filtering wind farms by number of turbines and installed capacity.

Whether you're a renewable energy researcher, wind farm developer, or environmental consultant, this interactive map tool makes it easy to locate wind turbines and export comprehensive ...
