

# Togo's new energy base station construction

Togo has reached a major milestone in its strategy to secure and diversify its electricity supply. The Nangbo hydroelectric dam, a strategic facility located in the Plateaux region that ...

Le Togo franchit une nouvelle étape décisive vers l'électrification intégrale de son territoire. Le 22 avril, le chantier de la centrale solaire de Dapaong a été officiellement lancé, lors ...

(Togo First) - The Dapaong Solar power plant is officially under construction. The works began on April 22 and should be completed within 13 months. The plant is located in the northern ...

Ce mardi 22 avril 2025 a eu lieu le lancement officiel des travaux de construction de la centrale solaire photovoltaïque de Dapaong, en présence du représentant du chef de l'État, ...

The Dapaong Solar Power Station is a 25 MWp ground-mounted solar photovoltaic power plant equipped with a 36 MWh battery energy storage system, located in Dapaong in Togo's northern ...

According to PV Tech, the project will be developed in multiple phases, with the first stage scheduled for completion by mid-2025. The solar park is expected to feed clean, cost-effective ...

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapaong solar project will include 36,000 solar panels across 52 hectares, along ...

This facility is designed to generate a peak power of 25 MWp and will include a storage capacity of 40 Megawatt-hours, which will illuminate approximately 60 rural localities in the Savanes region.

This agreement will finance feasibility studies for a battery energy storage system (BESS) project in Togo - a crucial step to integrate more renewable energy and achieve universal access to ...
