

In this episode of Business Line Uzbekistan, we look at how the country is rapidly embracing solar power, securing billions in foreign investment and cutting emissions to position itself as a...

The main purpose of this roadmap is to guide policy making at all levels to maximise the use of solar energy in Uzbekistan, and to serve as a precursor for a national solar energy strategy.

The solar power plant, which will be constructed in the Alat district of the Bukhara region, is projected to cut over 327,000 metric tons of CO2 emissions annually by generating more than 585 gigawatt ...

Uzbekistan is making strides in renewable energy, aiming to exceed 18,000 MW of solar and wind capacity by 2030, which will enable the country to generate 40% of its electricity from sustainable sources, save billions ...

The Bukhara solar plant alone, with 860,000 panels, can power 400,000 homes. By reducing CO2 emissions by 1.2 million tonnes per year, Uzbekistan is positioning itself as a leader in renewable energy in ...

By following this pathway, Uzbekistan can achieve its clean energy and climate objectives while building a fairer, more competitive, and resilient economy, one that combines environmental sustainability with social justice ...

This article will delve into the latest statistics on solar energy development in Uzbekistan, reviewing the key achievements of 2024 and outlining the ambitious plans set for 2025 and beyond.

OverviewPotentialGovernment PoliciesPhotovoltaicsResearch and developmentUzbekistan has great potential for solar energy due to its high levels of solar radiation and large areas of barren land that can be used for solar power plants. The country receives an average of around 300 sunny days per year, making it an ideal location for solar power generation.

Uzbekistan has abundant renewable energy potential, most of which lies in solar energy thanks to high solar irradiation. However, until now energy supply has been dominated by fossil fuels, with renewable energy - ...

In this edition of Business Line Uzbekistan, we look at how the country is rapidly embracing solar power, attracting billions in foreign investment and cutting emissions to become a leader in renewable energy.
