

# Where wind power is generating the most

Wind power is a significant source of energy in over half of all countries worldwide, with Denmark producing 58 of its electricity from wind. China, the global leader in wind energy generation, ...

China continues to be the driving force behind wind power expansion, accounting for nearly 66% of global capacity additions last year. Major wind farms in regions like Inner Mongolia and ...

Here is the list of world's leading renewable energy generating countries in the world. 1. China is a global leader in wind energy generation. The country had a significant installed capacity ...

Wind energy generation varies by state. Discover the states with the most wind energy in Choose Energy's February 2026 Wind Generation Report.

Wind electricity generation, billion kilowatthours, 2022: The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the ...

Feb 2, 2026; Wind energy generation varies by state. Discover the states with the ...

China is the largest producer of wind power in the world, having generated 466.5 terawatt hours (TWh) of wind power in 2021, more than 29% of the global total of 1,596.4 TWh produced during the year.

Wind power is used on a commercial basis in more than half of ...

Wind energy generation by region Measured in terawatt-hours. Includes both onshore and offshore wind sources.

The countries with the most total capacity of wind energy have also seen the greatest increase in both onshore and offshore wind energy production in recent years.

Wind power is used on a commercial basis in more than half of all the countries of the world. [3] Denmark produced 58% of its electricity from wind in 2023, a larger share than any other country.

Eleven countries now generate more than 20% of their electricity from wind, and seven of these have a share of 30% or more: the leader Denmark, which generates more than one in two ...
