

# Wind power generation power chart

Global wind power generation capacity (GW) for 2010-2022 broken down by onshore and offshore. Additional chart showing 2022 market share by region and illustrative map showing historical by ...

This dataset contains yearly electricity generation, capacity, emissions, imports and demand data for European countries. You can find more about Ember's methodology in this document.

Value of wind power generation. Wind turbines in operation convert available wind energy close to the earth's surface, which is renewable, carbon-free, into a quantity of electricity ranging from 1,700 to ...

Combined Wind and Solar is a graphical representation of estimated wind and solar power production amounts for the Current Operating Day and the Next Day.

Also includes information on each country's actual yearly production ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

An interactive line chart showing U.S. annual wind electricity generation in billions of kilowatthours and wind energy's percentage share of total annual U.S. electricity generation in 1990 through 2022. The ...

Also includes information on each country's actual yearly production of wind-generated electricity, as well as the amount of electricity generated in offshore wind farms as compared on onshore farms.

It contains data about wind farms, turbines, manufacturers, developers, operators, owners and also pictures and cartographical data.

Wind power generation in the Net Zero Scenario, 2015-2030 - Chart and data by the International Energy Agency.

Wind supplies 57% of Denmark's electricity generation and over 20% in ten other countries. 7 Global wind additions reached a record 117 GW in 2023. 7 In 2024, onshore installations surpassed 100 GW ...
