Why do solar panels cost so much?

The size of your solar power system, measured in kilowatts (kW), is the most important factor affecting solar panel prices. Naturally, larger systems cost more than smaller ones, but they usually offer a lower cost per watt. Solar panels typically account for 12 - 18% of the total installation cost.

How much do solar panels cost in 2025?

In 2025, panel prices range from \$2 to \$3 per watt, depending on the brand and conversion efficiency. Higher-quality, more efficient panels come with a higher upfront cost but will yield better long-term performance. Labor, permitting, and inspection costs also significantly impact the total system cost.

How much does a solar battery cost?

They store the energy accumulated from the solar panels. The price varies based on the installer, application and location. Batteries typically cost \$12,000 to \$22,000, according to the Department of Energy, although smaller capacity systems are available for less. In some cases, solar batteries may be more expensive than solar panels.
